Annual Index, Document de références

Volume 59, 1976

An aggressive engineering organization contributes to Alberta's growth, No 2, March/April, p 7.

Alberta — land of engineering opportunity, No 2, March/April, p 6.

B.C. Research expands and innovates, No 4, July/August, p 20.

Barringer Research looks to energy for the future, No 6, November/December, p 7.

The birth of the EIC, W.G. Richardson, No 1, January/February, p 54.

Building the Rideau, Edward F. Bush, No 2, March/April, p 41.

CAD/CAM expected to yield significant productivity improvement, Jack Scrimgeour, No 6, November/December, p 12.

CN Tower, Ian Reid, No 1, January/February, p 38; No 3, May/June, p 43.

CSME 1976 Guide, No 4, July/August, p 61; No 5, September/October, p 58.

CSME 1976 guide to Limits and Fits — Basic Hole System, Fred Rimrott and Max Aguayo, No 5, September/October, p 58.

CSME 1976 guide to preferred numbers, Fred Rimrott and Max Aguayo, No 4, July/August, p 61.

Can Canada harness the wind?, Bruce McCallum, No 5, September/October, p 46.

Canada's nuclear program and manufacturing, James A. Weller, No 6, November/December, p 14.

Canada's thrust in space technology, Gordon Hutchison, No 3, May/June, p 4.

Canadian Council of Professional Engineers, No 1, January/February, p 58; No 2, March/April, p 45; No 3, May/June, p 56.

Canadian engineers study Chinese earthquake technology, A.C. Heidebrecht, K. Whitham, M.J. Barry, E.R. Kanasewich and W.G. Milne, No 5, September/October, p 35.

Canadian independence and the U.S. subsidiary, J. Herbert Smith, No 6, November/December, p 18.

Canadian Manufacturing Report, No 6, November/December, p 5.

Canadian remote manipulator system for NASA Space Shuttle, Ian Reid, No 3, May/June, p 12.

Canadian tracked vehicles world leaders, No 6, November/December, p 5.

Conseil de la main-d'oeuvre servit les intérêts des planificateurs de resources humaines, No 3, Mai/Juin, p 56.

Consulting engineers and Canada's future, No 4, July/August, p 65.

A counter-proposal on industrial innovation, Dr. Josef Kates, No 2, March/April, p 70.

Crown organization helps exporters remain competitive, No 6, November/December, p 20.

De Havilland bush aircraft for the Canadian North, No 6, November/December, p 9.

Development of a Canadian welding technology — an engineering challenge, Dr. N.F. Eaton, No 2, March/April, p 62.

Dr. Organ's needle used in 16 countries, No 6, November/December, p 6.

EIC Annual Congress: Energy — Conversation or Conservation, No 4, July/August, p 5.

Early schools met local needs, George Richardson, No 4, July/August, p 49.

Energy conservation — can it help cure the energy crisis?, Ron Glen, No 4, July/August, p 43.

Engineering: Manpower with a mission — ENGCON '76, Ian Reid, No 3, May/June, p 52.

Engineering and management — a new breed of engineers, Mary Schmieder, No 2, March/April, p 46.

Engineering association has numerous roles, No 5, September/October, p 7.

Engineering council concerned over Technical Council report, No 2, March/April, p 45.

Engineering in Alberta, No 2, March/April, p 6.

Engineering in B.C., No 4, July/August, p 16.

Engineering in Nova Scotia, No 5, September/October, p 5.

Engineering in Ontario, No 6, November/December, p 31.

Engineering in Quebec, No 1, January/February, p 6.

Engineering in Saskatchewan, No 3, March/April, p 16.

Engineering our profession's structure for the needs of the 1980s, Manfred Rotmann, No 1, January/February, p 72.

Engineering research at the Alberta Research Council, No 2, March/April, p 11.

Engineering schools enter a new era, George Richardson, No 5, September/October, p 44.

Engineers invited to work on performance standards, R.W. Racine, No 1, January/February, p 70.

Engineers optimistic despite problems, No 4, July/August, p 16.

Environment for innovation "lousy" in Canada, No 5, September/October, p 16.

Environmentally Appropriate Technology, Bruce McCallum, No 1, January/February, p 27; No 4, July/August, p 33; No 5, September/October, p 46.

Expansion du rôle de l'ingénieur-conseil dans l'industrie nucléaire, Pierre C. Fortier, No 5, Septembre/Octobre, p 22.

Federal development agency gives boost to small business growth, No 6, November/December, p 22.

Federation fosters interprovincial cooperation, No 1, January/February, p 58.

GM Diesel Division builds giant trucks, No 6, November/December, p 7.

The Goose Farm Fable, H.J. Chapman, No 1, January/February, p 26.

Habitat — a meeting place for engineering ideas, Colleen Isherwood, No 4, July/August, p 22.

Halifax Shipyards Division builds drilling rigs as well, No 6, November/December, p 9.

Heavy oil recovery in the Alberta oil sands, Hugh McIntyre, No 1, January/February, p 61.

High-powered experimental satellite proves new concepts for commercial communications systems, Gordon Hutchison, No 3, May/June, p 8.

Innovative social development needed for Ontario's north, Colleen Isherwood, No 1, January/February, p 49.

Is coal gasification the answer?, Charles Law, No 1, January/February, p 20.

Is Electrification the answer?, David Cass-Beggs, November/December, p 36.

Is there a future for LRT?, Norman D. Lea, No 2, March/April, p 33.

James Bay — protecting the environment, Armand Couture, No 1, January/February, p 16.

La Grande 2 comparative study of dam types, G.S. Larocque and Yves Pigeon, No 1, January/February, p 10.

LRV: The Canadian Light Rail Vehicle, Lorne Main, No 5, September/October, p 18.

Metric Commission Steering Committee structure, No 3, May/June, p 62.

Metric time, No 5, September/October, p 60.

Metriction, No 3, May/June, p 57; No 4, July/August, p 61; No 5, September/October, p 58; No 5, September/October, p 60.

New priorities for Quebec's research centre, No 1, January/February, p 6.

New safety hazard, Fred P.J. Rimrott, No 3, May/June, p 63.

The northern railway option, R.W. Lake and M.D. Roney, No 2, March/April, p 28.

Nova Scotia engineers hope for recovery, No 5, September/October, p 5.

Nova Scotia Research puts technology to work, No 5, September/October, p 8.

Ontario Research based on industry-government cooperation, No 6, November/December, p 34.

Ontario engineers change with the times, No 6, November/December, p 32.

Petrochemical producers must grasp opportunity, Hugh McIntyre, No 4, July/August, p 62.

Problems beneath an impressive facade, No 6, November/December, p 31.

Production engineering comes of age, Jack Brooksbank, No 6, November/December, p 10.

Railway laboratory fosters collaboration between government and industry, S.H.G. Connock, C.A.M. Smith and F.F. Blader, No 2, March/April, p 31.

Railways enter an era of change, No 2, March/April, p 19.

Saskatchewan association represents a capable group of engineers, No 3,
